PROFESSIONAL SUMMARY

Dedicated and adaptable Software Developer with hands-on experience across the MERN stack and Python. Passionate about crafting efficient digital applications, automation tools, and APIs with clean, scalable code. Strong foundation in IT support and a proven ability to bridge software and infrastructure needs in professional environments.

CORE SKILLS

- Languages & Frameworks: JavaScript (ES6+), Python, Node.js, Express.js, React, PHP, Django
- Databases: MongoDB, MySQL
- Tools & Practices: Git/GitHub, Agile, API Integration, Deployment, Testing
- Other: UI Design Basics, Technical Support, Data-Driven Applications

KEY PROJECTS

- Social Media Web Scraper (Selar.com): Built an automated Python & Selenium API to analyze and segment follower data for 300k+ profiles.
- Educational Resource Sharing Platform: Designed and deployed a web app to improve collaboration and accessibility for university students.
- Real-Time Weather App: Created a responsive weather dashboard with live API integration for real-time updates.
- Engineering Mentorship Website: Collaborated on a platform connecting engineering students with mentors.
- Email Automation Scripts: Developed Python tools for weekly reminders and automatic spam cleanup.

WORK EXPERIENCE

- IT & Junior Software Developer – TEHC (Total Energies Housing Cooperative) (Oct 2025 – Present)
  - • Maintain and support all technical tools within the organization.
  - • Contribute to internal software development projects.
  - • Test API endpoints and prepare detailed bug reports.
- Software Engineering Intern – Selar.com (Aug 2025 – Oct 2025)
  - • Developed a social media web scraper that processed 300k+ profiles.
  - • Built custom frontend templates and collaborated on live production deployments.
- Software Engineering Intern – Drevad Ltd. (UK) (Jan 2025 – Mar 2025)
  - • Supported backend and frontend tasks across live client applications.
  - • Assisted with code debugging and performance optimization.
- Software Engineering Intern – Flance (Jul 2024 – Oct 2024)
  - • Contributed to feature testing and bug fixing in a fast-paced startup environment.
- Web Developer – BigMik Gadget Hub (Feb 2024)
  - • Built and maintained a dynamic e-commerce prototype for gadget sales.

EDUCATION

B.Sc. Educational Technology – University of Ilorin, Kwara State
CGPA: 4.0 | Graduated: 2024

CERTIFICATIONS & TRAINING

- CS50 Web Development with Python & JavaScript – Harvard University
- Responsive Web Design & OOP with Python – FreeCodeCamp
- Backend Web Development with Django – FreeCodeCamp
- Web Scraping with Python (BeautifulSoup, Selenium)
- React Course – Udemy (Jonas Schmedtmann)
- Microsoft Azure Fundamentals
- Cloud Security Fundamentals – Simplilearn
- React Full Course – Eudereka
