

FERANMI FAVOUR OYETUNDE

Frontend Software Engineer | React • TypeScript • MERN • Automation

Lagos, Nigeria | +234 903 616 1857 | feranmioyetunde@gmail.com | github.com/Feranmidelops | linkedin.com/in/feranmi-oyetunde

PROFESSIONAL SUMMARY

Frontend Software Engineer with hands-on experience building production-grade web applications across cooperative finance, e-commerce, analytics, and workflow automation. Experienced in transforming complex Figma designs into scalable React applications, integrating REST APIs, and shipping responsive user experiences that solve real business problems. Built business-critical tools including admin platforms, financial calculators, analytics dashboards, workflow automations, secure payment/settlement systems, and Python scraping systems processing 300,000+ records.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Vite, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Convex

Databases: PostgreSQL (Supabase), MongoDB, Appwrite

Auth & Payments: JWT, httpOnly Refresh Tokens, CSRF Protection, RBAC, Paystack Integration

Automation: Python, Selenium, Web Scraping, Nodemailer, Microsoft Power Automate, SharePoint Automation

Testing & Tools: Vitest, Git, GitHub, Postman, Swagger, Vercel, Netlify, Render, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer & IT Systems Support | TEHC (Total Energies Housing Cooperative) Oct 2025 – Present

- Converted 50+ complex Figma screens into responsive React + Tailwind interfaces.
- Built reusable UI components that accelerated delivery across modules.
- Integrated backend REST APIs, validated endpoints with Swagger, and produced technical documentation.
- Designed SharePoint workflow automations for inventory alerts and boardroom scheduling.
- Provided internal hardware, software, and network technical support.

Frontend Developer | ACUOP.com

Jan 2026 – Present

- Architected a multi-role admin platform with role-based access control.
- Developed real-time analytics dashboards for business transaction metrics.
- Engineered automated financial calculators replacing manual processes.
- Built onboarding, verification, and approval workflows.

Software Engineering Intern | Drevad Ltd. (UK) — Remote

Jan 2025 – Mar 2025

- Designed and built a full-stack e-commerce platform end-to-end — product catalog, cart, checkout, order management, and a role-based admin dashboard — using React/Vite/Tailwind and Node/Express with a PostgreSQL (Supabase) backend.
- Engineered a secure authentication system with short-lived JWT access tokens, rotating httpOnly refresh cookies, and CSRF protection, replacing a long-lived-token model and enabling true server-side session revocation on logout.
- Integrated Paystack for online payments, architecting an idempotent settlement flow (webhook + client-verify reconciliation) that structurally prevents double-charge and double-fulfillment race conditions.
- Built a granular role-based access control system (super admin, sales admin, finance admin) with permission-scoped API routes and a hardened, separate admin authentication path.
- Built a CSV bulk product import pipeline with per-row validation, duplicate-key detection, and partial-success error reporting — turning manual one-by-one catalog entry into a single batch upload.
- Wrote a Vitest test suite covering money-critical logic (coupon discount math, payment settlement, order-status mapping) across both frontend and backend.

SELECTED PROJECTS

- Cooperative Finance Admin Platform — enterprise dashboards for analytics and approvals.

- Audio Commerce Platform — full-stack e-commerce app with transactional email flow.
- Movie Discovery Platform — search-driven recommendation and trending engine.
- Audience Intelligence Scraper — automated Python pipeline processing 300,000+ profiles.
- JWT Notes Application — secure CRUD app with authentication and protected routes.

EDUCATION

B.Sc. Educational Technology — University of Ilorin, Nigeria | 2024 | CGPA: 4.0 / 5.0

CERTIFICATIONS

- CS50 Web Development with Python & JavaScript — Harvard University
- React — Complete Guide
- Responsive Web Design
- Backend Development with Django
- Web Scraping with Python
- Microsoft Azure Fundamentals
- Cloud Security Fundamentals
